## Question 1:

Create a Bucket in IBM Object Storage.

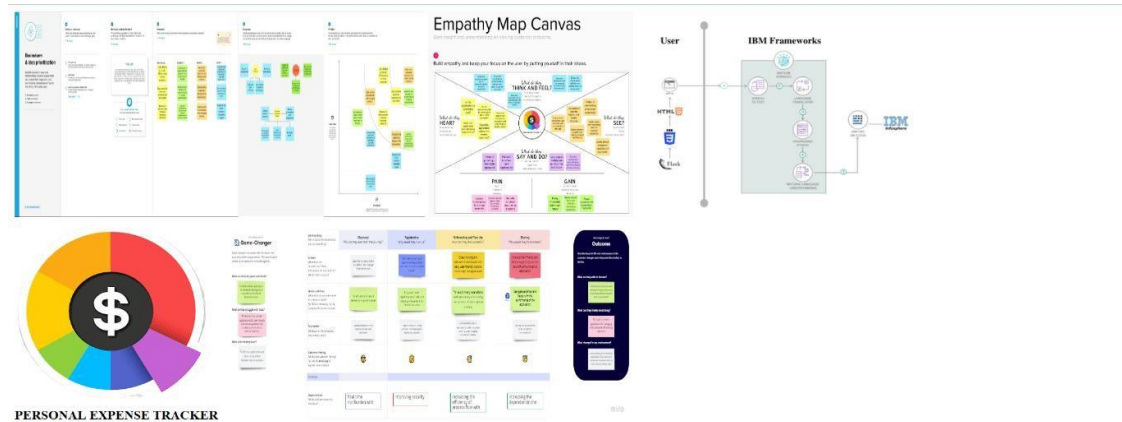

The screenshot displays the IBM Cloud Object Storage interface. On the left, a sidebar contains navigation links: Cloud Object Storage, Storage instances, assignment-object-storage (with a dropdown arrow), Buckets (highlighted), Integrations, Endpoints, Usage details, Service credentials, Connections, and Plan. The main area is titled 'Objects' and includes tabs for 'Configuration' and 'Permissions'. A message states: 'If you're seeing more usage than expected, versions count towards your usage or you may have incomplete uploads [Learn more](#)'. Below this is a search bar labeled 'Prefix filter' and an 'Upload' button. A table lists objects with columns for 'Object name', 'Archived' (with a help icon), 'Size', and 'Last modified'. The table contains six entries, each with a checkbox and a three-dot menu icon. The last entry, 'PNG ...E.png', has a blue 'Download' button. At the bottom, a dashed line separates the table from a footer note: 'Downloaded from IBM Cloud Object Storage'.
